From Dan Kees

Subject: Preparation for July 12th Joint Long Range Planning Workshop

6-24-25

We didn't take minutes of the Jan. 18th workshop, but I did take a couple of pictures of Cindy's dry erase board that listed some summary bullet points from the panel and from the public.

Panel:

- Roads – monthly updates. Intent was to have a subgroup working on this.
- City agenda (not sure what the action item was supposed to be)
- Sources of revenue. Intent was to get a subgroup working on this.
- Quarterly meetings
- Committee on grants – monthly updates.

Public comments:

- Communication
- Remember our history
- Supports roads idea
- City is new
- Sees one entity
- Mission – what can we do together
- Wants alignment
- Loop in Ark. Reps for help/support
- Monthly communication

Under the category of "Future"

- Long term plans
- Steps to no SID by 2031 (milestones 5 year plan)
- Grants
- Look for quick easy wins
- Agreement

The workshop was basically brainstorming and gaging public support and was generally considered a huge success. Significant progress was made on planning a transition for road maintenance. The next workshop should be more bullet point oriented with a goal of agreeing on developing a 5 year plan and assigning subgroups to work on specific elements of the plan.
